## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. Claim(s) 1, drawn to a method to produce electronic components with closely adjacent electrodes on a substrate, wherein the metal vapor is deposited on the photo lacquer.

II. Claim(s) 2-4, drawn to a method to produce electronic components with closely adjacent electrodes on a substrate, wherein the photo lacquer is deposited on a metal layer

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 12.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The inventions are categorized as follows:

Group I: inward beveling of an insulating material into the beveled zones.

Group II: structuring of a metallic layer by means of a photosensitive resist, etching of the metallic layer under the photosensitive resist, and deposition of another metallic layer.

The only recognizable common special technical feature could be the result of the two inventions, namely the structuring of electrodes by etching underneath layers of photosensitive resist. However, this technical feature is already known from Zappella et al. (U.S.P.No. 5,091,288; *figure 6, metallic layers 25 and 27, photosensitive resist layers 15 and 19*).

Art Unit: 2891

The technical feature represented by the structuring of electrodes by etching underneath layers of photosensitive resist is thus not novel and does not represent a contribution over the prior art. Therefore, the two inventions do not share a common inventive concept which could establish unity of invention under PCT Rule 13.1

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
